

Green Light Escrow

Project Brief

- Green Light Escrow is a New Zealand-based web application designed for employers and tradies, facilitating job creation, assignment, payment management, and dispute resolution. Users can register, create jobs, handle disputes, and chat. The system also features a super admin dashboard for payment history and dispute management.

Key Challenges

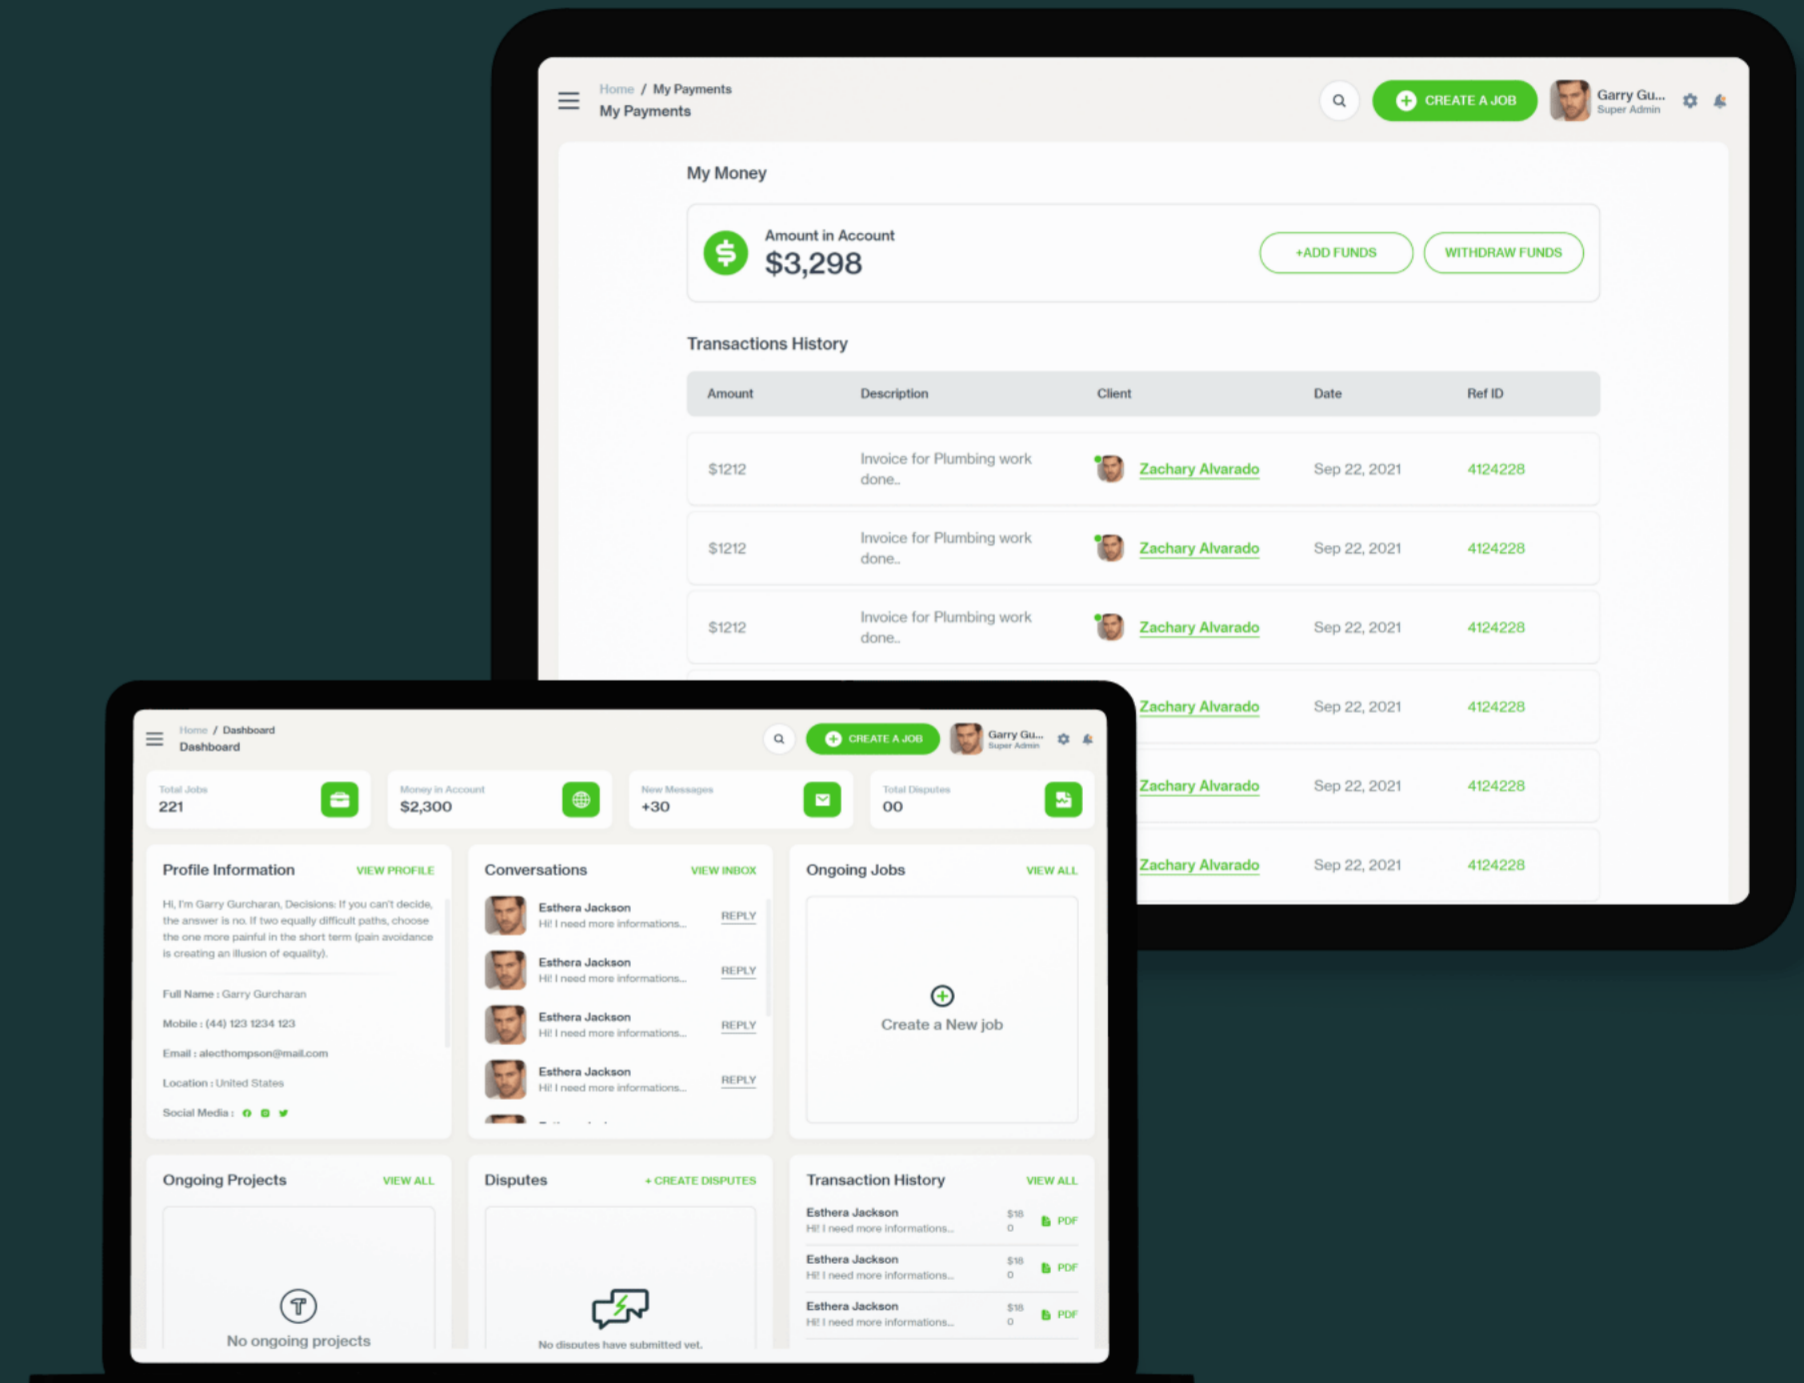

- **Real-Time Chat:** Enabling real-time chat for immediate communication between tradies and employers.
- **Push Notifications:** Implementing push notifications to keep users informed about job updates.
- **User Role Management:** Efficiently managing user roles and permissions to control access.
- **Fund Management:** Splitting funds based on job completion and managing transactions across multiple bank accounts.
- **Dispute Resolution:** Establishing a system for users to raise and handle job disputes effectively.
- **Interim Change Requests:** Addressing frequent changes in project requirements with a structured process.
- **Milestone Payments:** Implementing a system for payments based on project milestones.
- **Payment History:** Recording and tracking payment history for transparency.
- **Admin Dashboard:** Develop a comprehensive dashboard for super admins to manage the platform.
- **Database Integration:** Integrating and efficiently managing data in MySQL for seamless operations.

Solution Delivered

- **Chat Integration:** Utilize Pusher SDK for real-time chat functionality.
- **Push Notifications:** Implement push notifications for job updates.
- **Role-Based Access Control:** Develop a role management system for user access control.
- **Fund Management Module:** Create a module to manage funds and distribute payments.
- **Dispute Resolution System:** Implement a dispute management system with live chat support.
- **Change Request Handling:** Carefully address and incorporate client's change requests.
- **Milestone Payment System:** Design a system for milestone-based payments.
- **Payment History Log:** Record and display payment history for transparency.
- **Comprehensive Admin Dashboard:** Build a robust dashboard for super admins to oversee all aspects of the system.
- **MySQL Integration:** Integrate MySQL database for efficient data storage and retrieval.

Highlighted Features

- User registration and role management.
- Real-time chat for communication.
- Fund management and payment distribution.
- Dispute resolution system with live chat support.
- Job creation and assignment.
- Payment milestones and history.
- Admin dashboard for oversight.
- Comprehensive user and job management.
- Push notifications for job updates.
- Secure and efficient MySQL database integration.
