

NterNow

Project Brief

- NterNow is a revolutionary platform transforming the real estate industry. It offers a hardware-driven solution to empower potential homebuyers and tenants. This innovative product provides a secure and convenient way for individuals to tour properties, regardless of agent availability independently.

Key Challenges

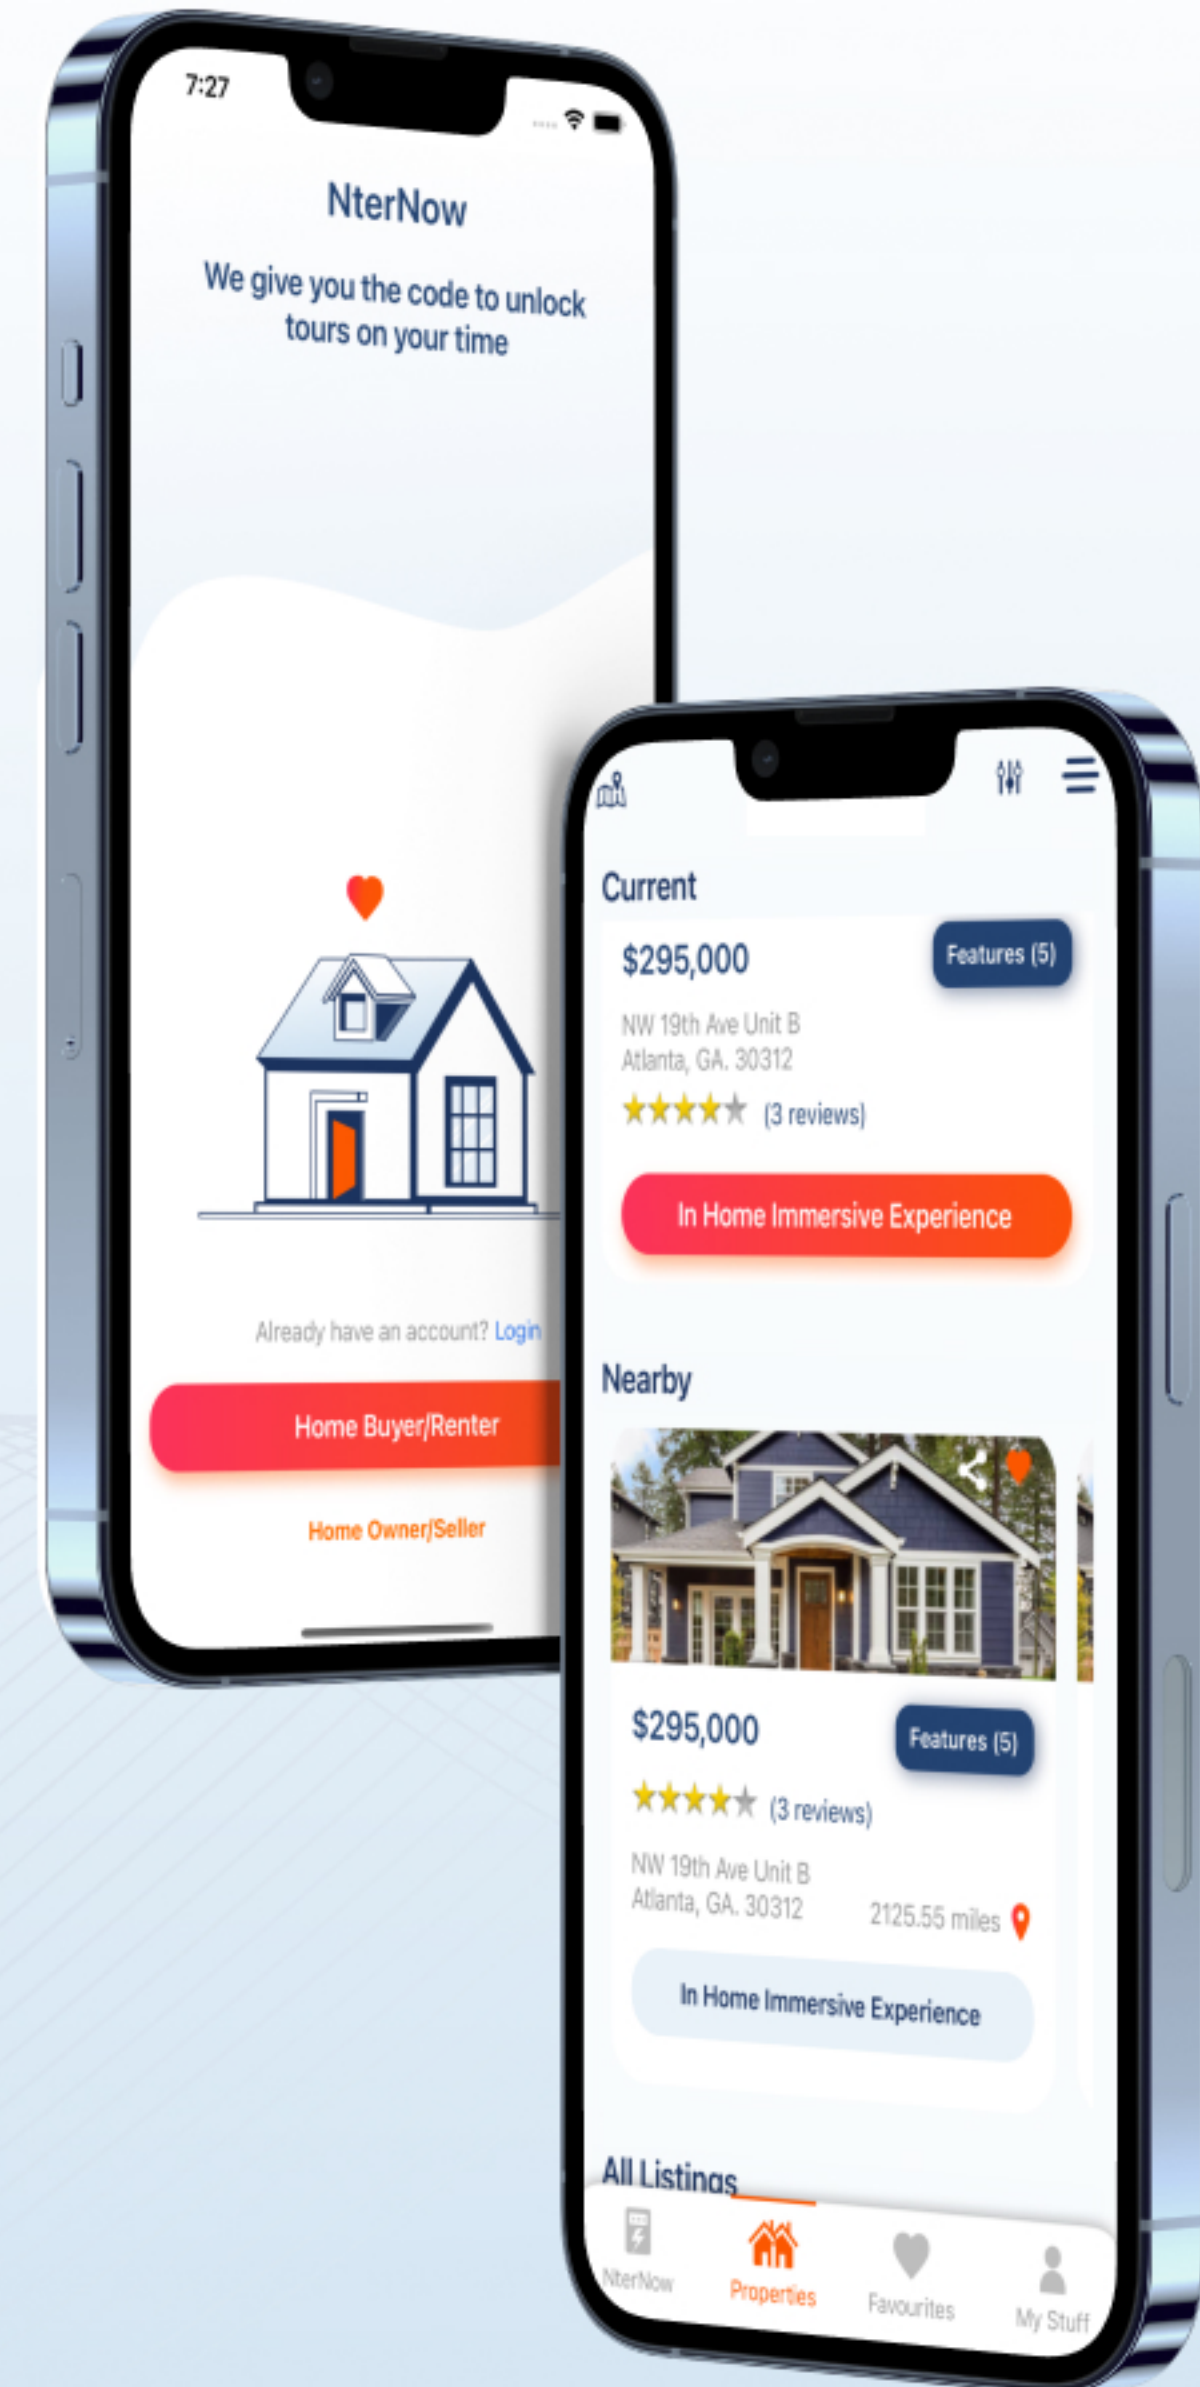

- **Providing Instant Access:** Enabling potential buyers to tour properties instantly without requiring the presence of a real estate agent.
- **Secure Property Access:** Ensuring the security of properties while granting access to interested parties.
- IoT Integration for Property Access and Security

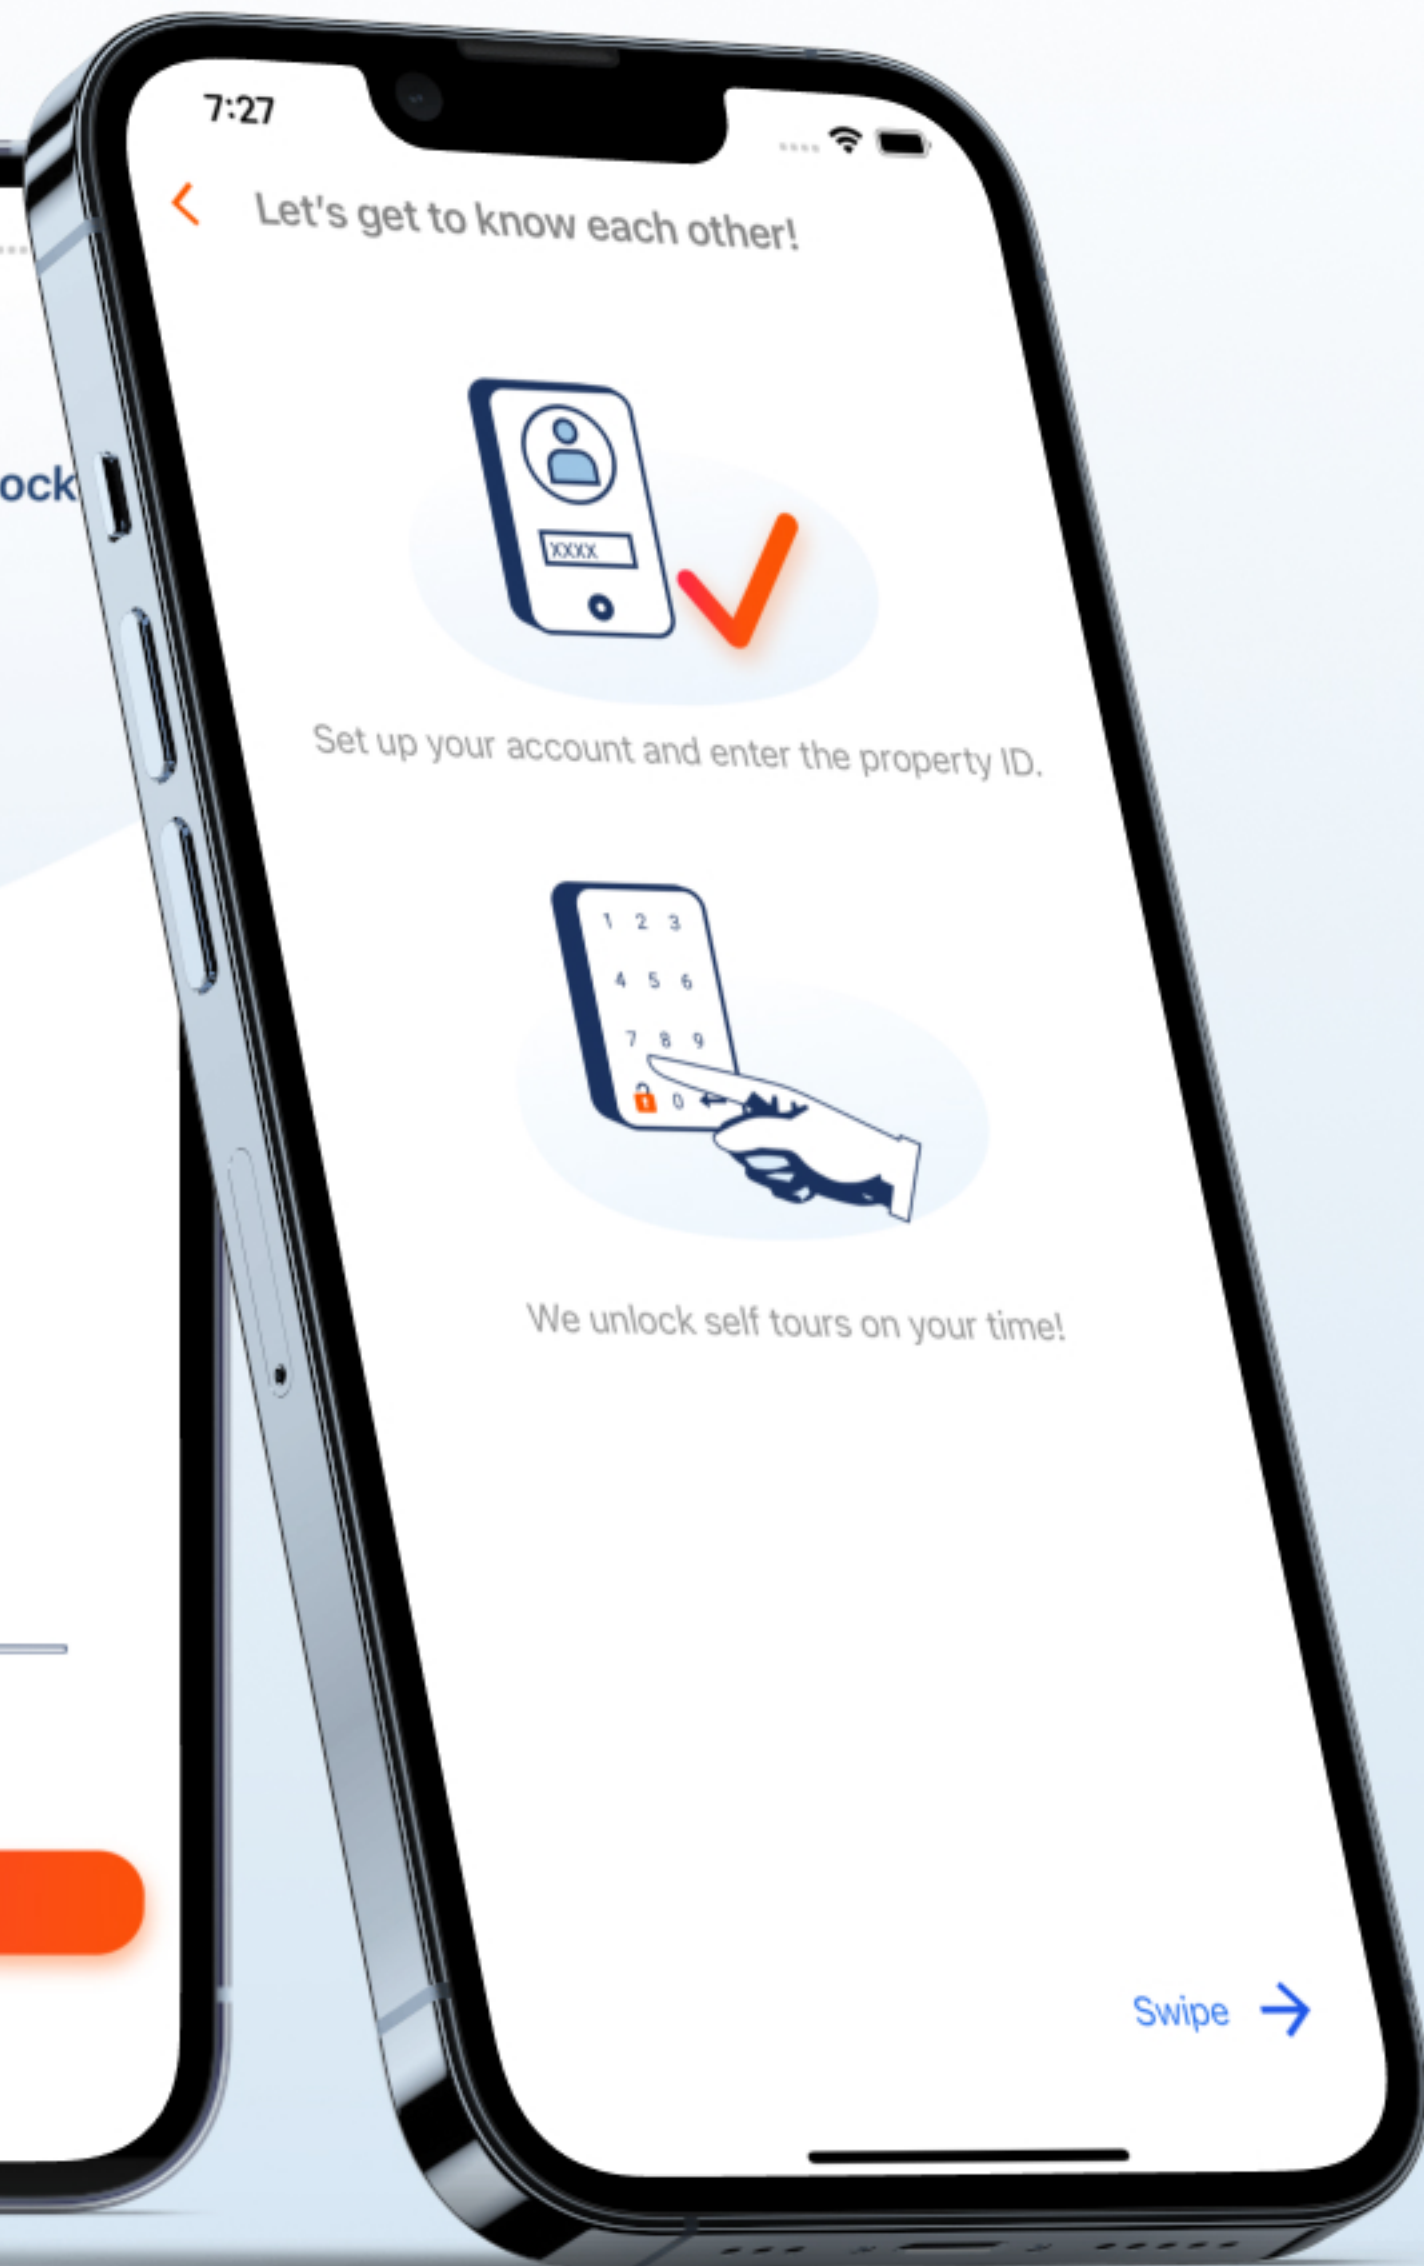

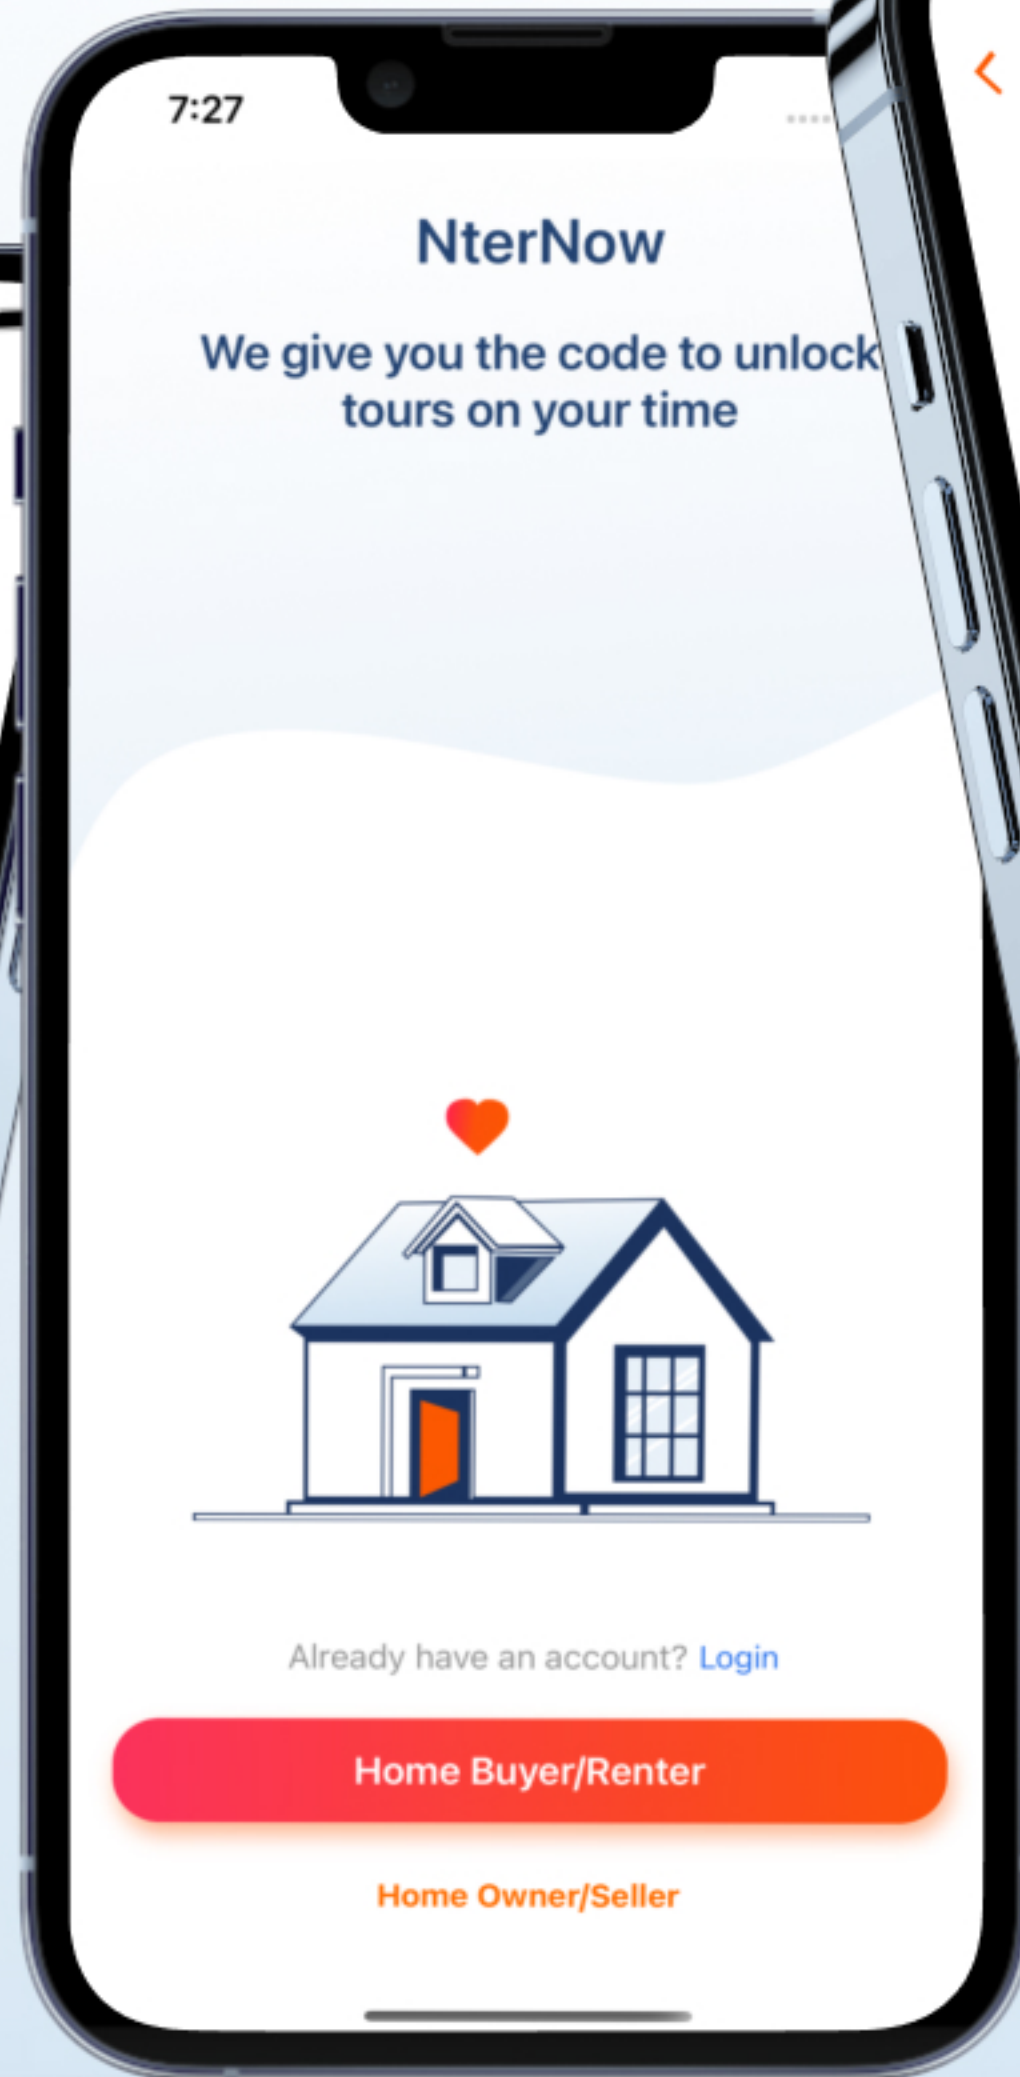

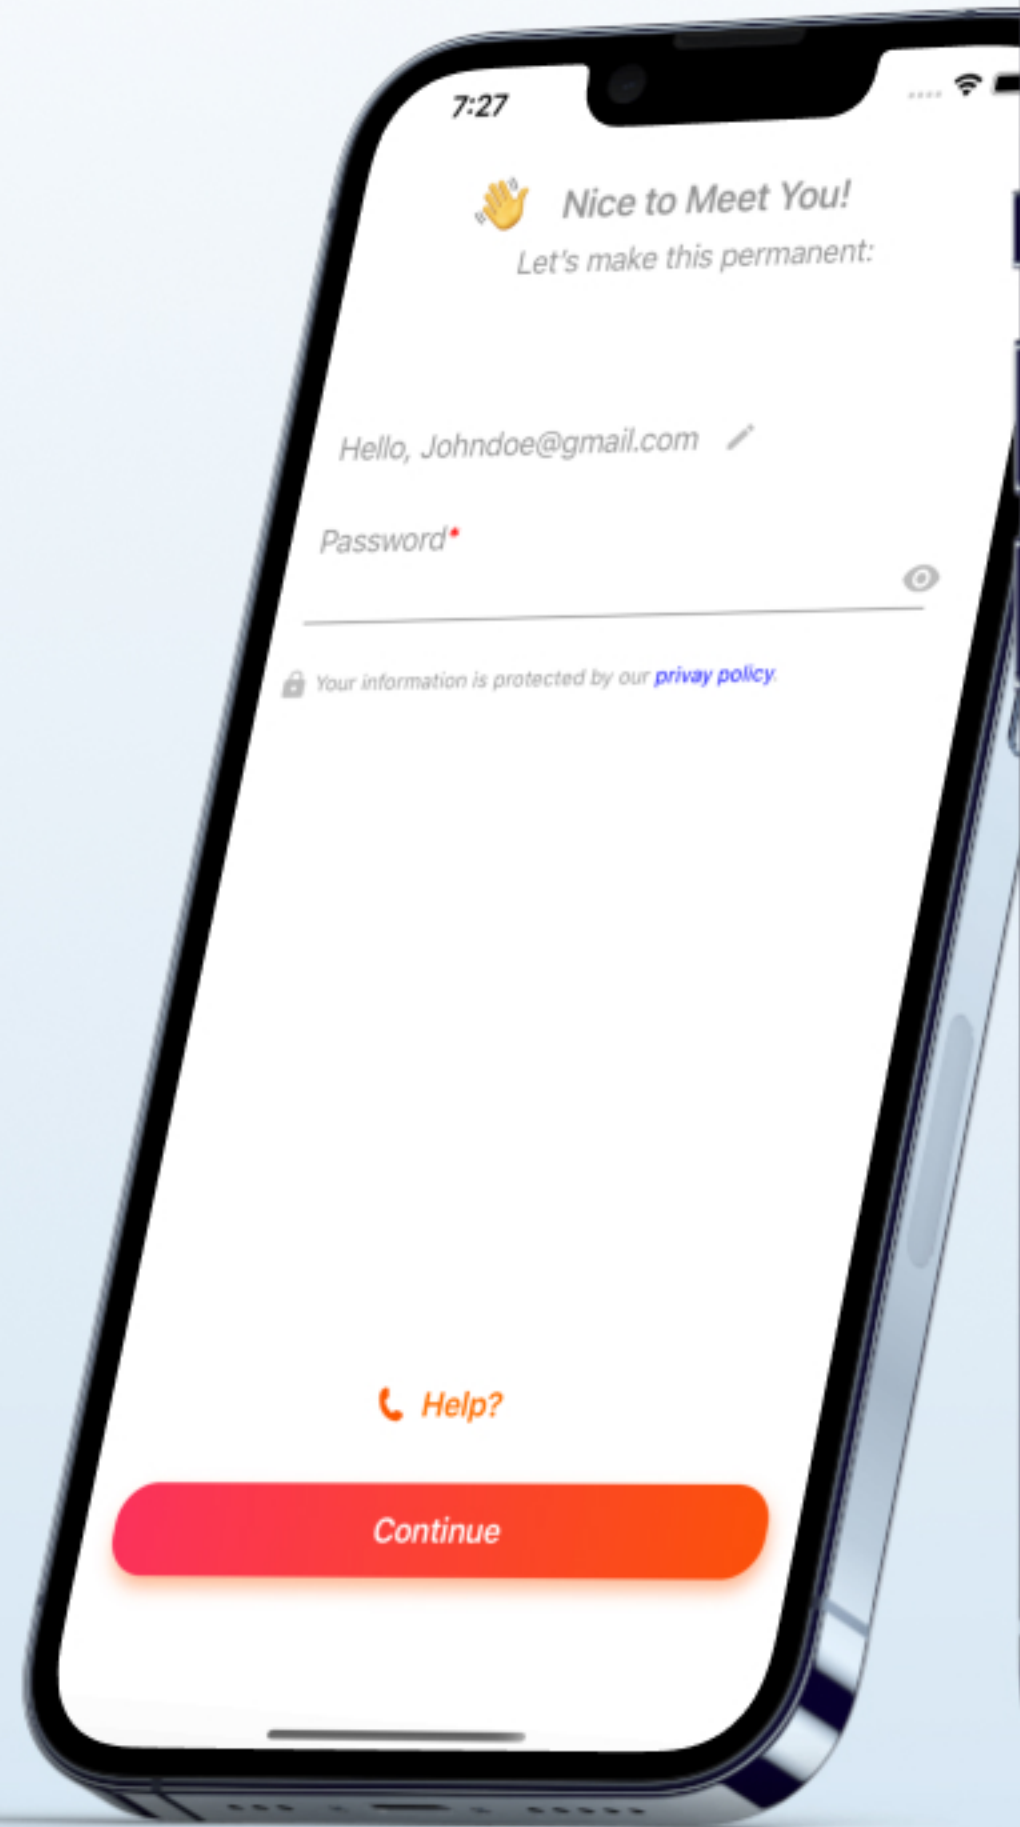

Solution Delivered

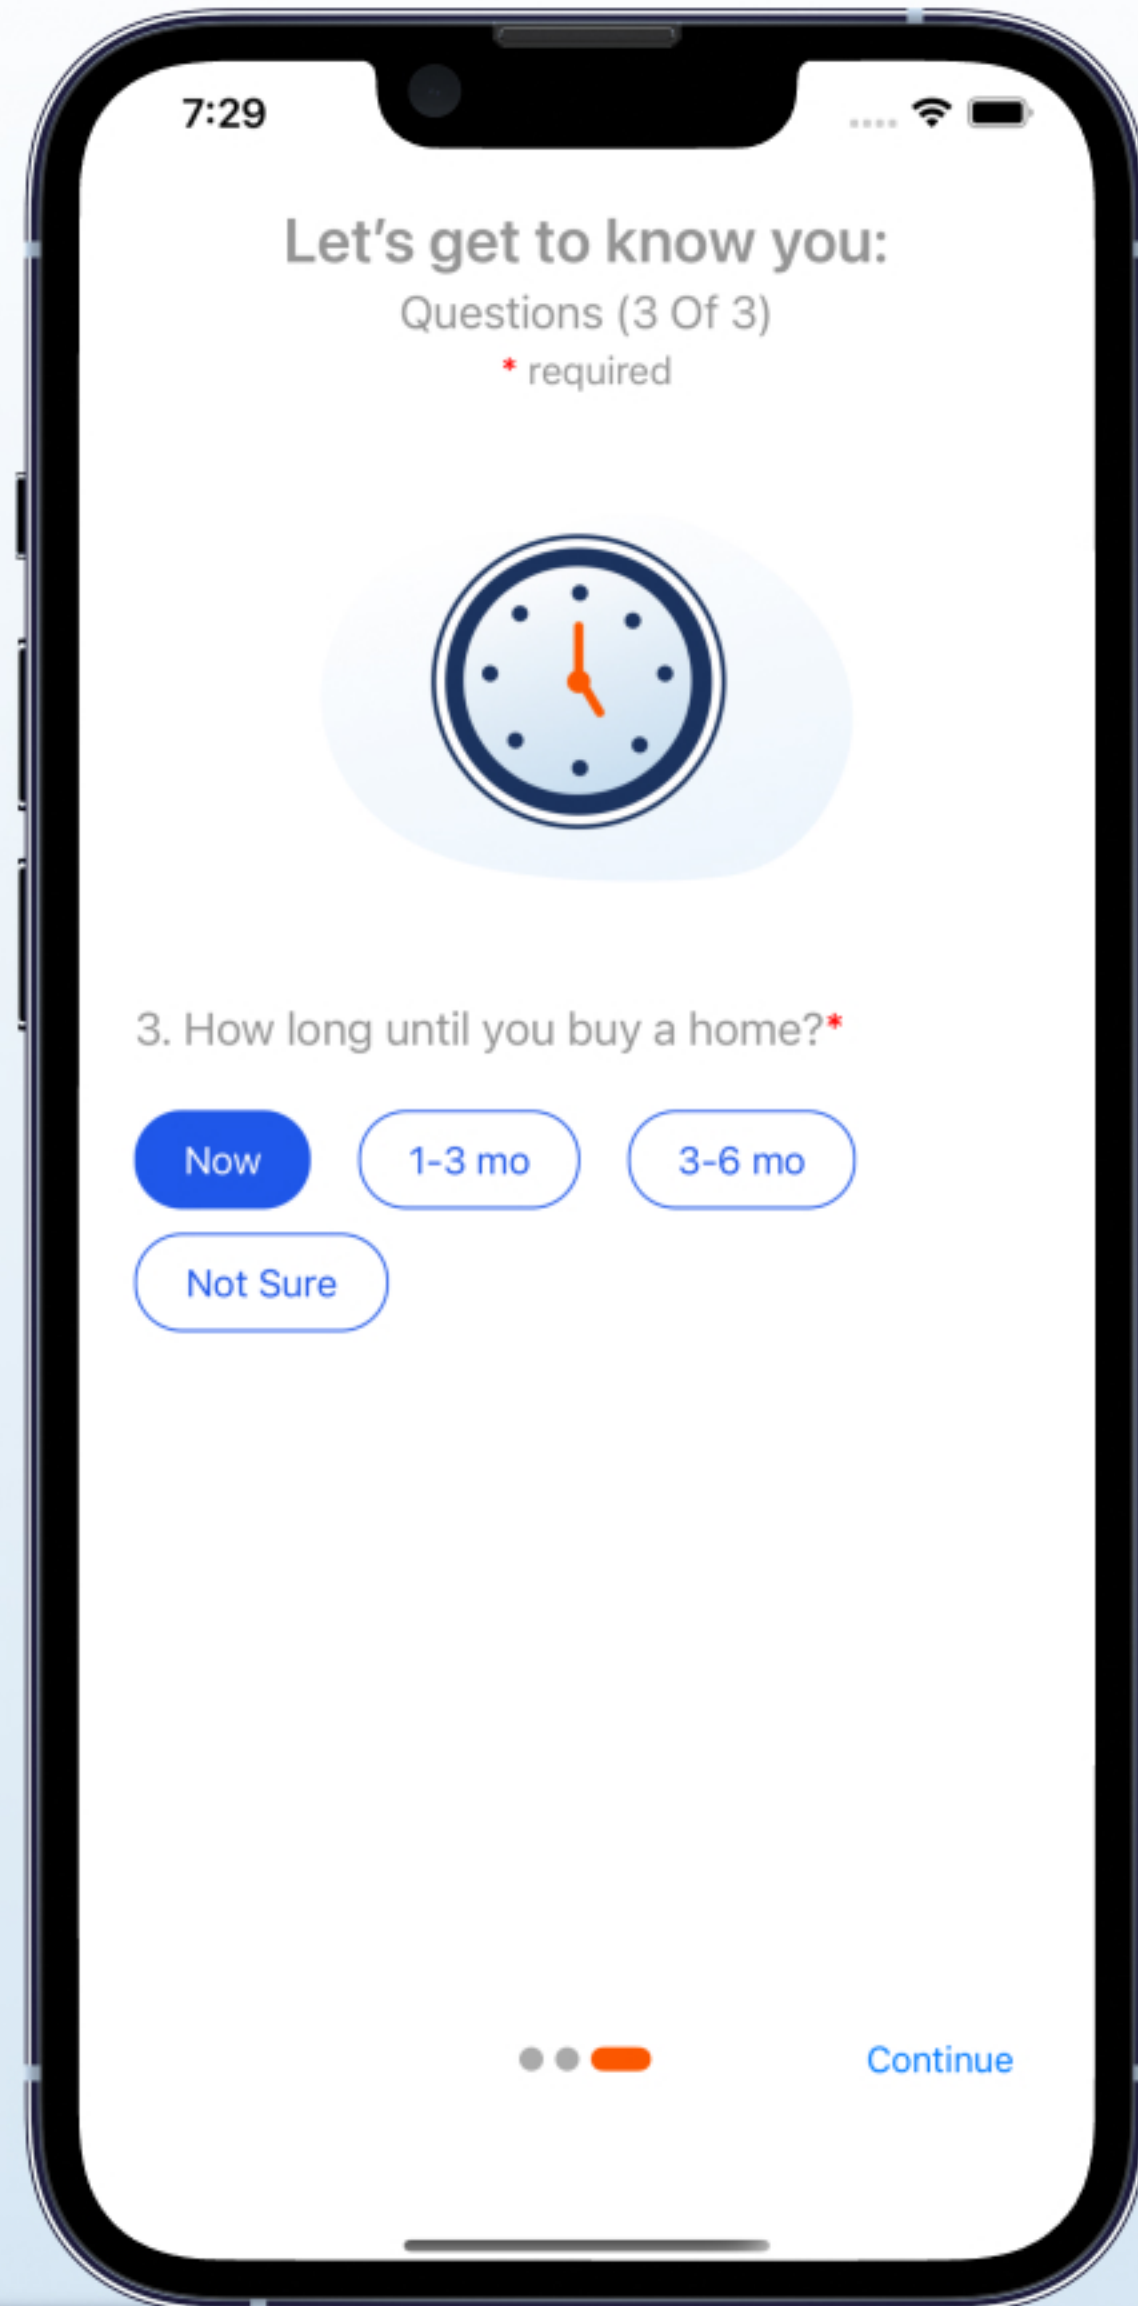

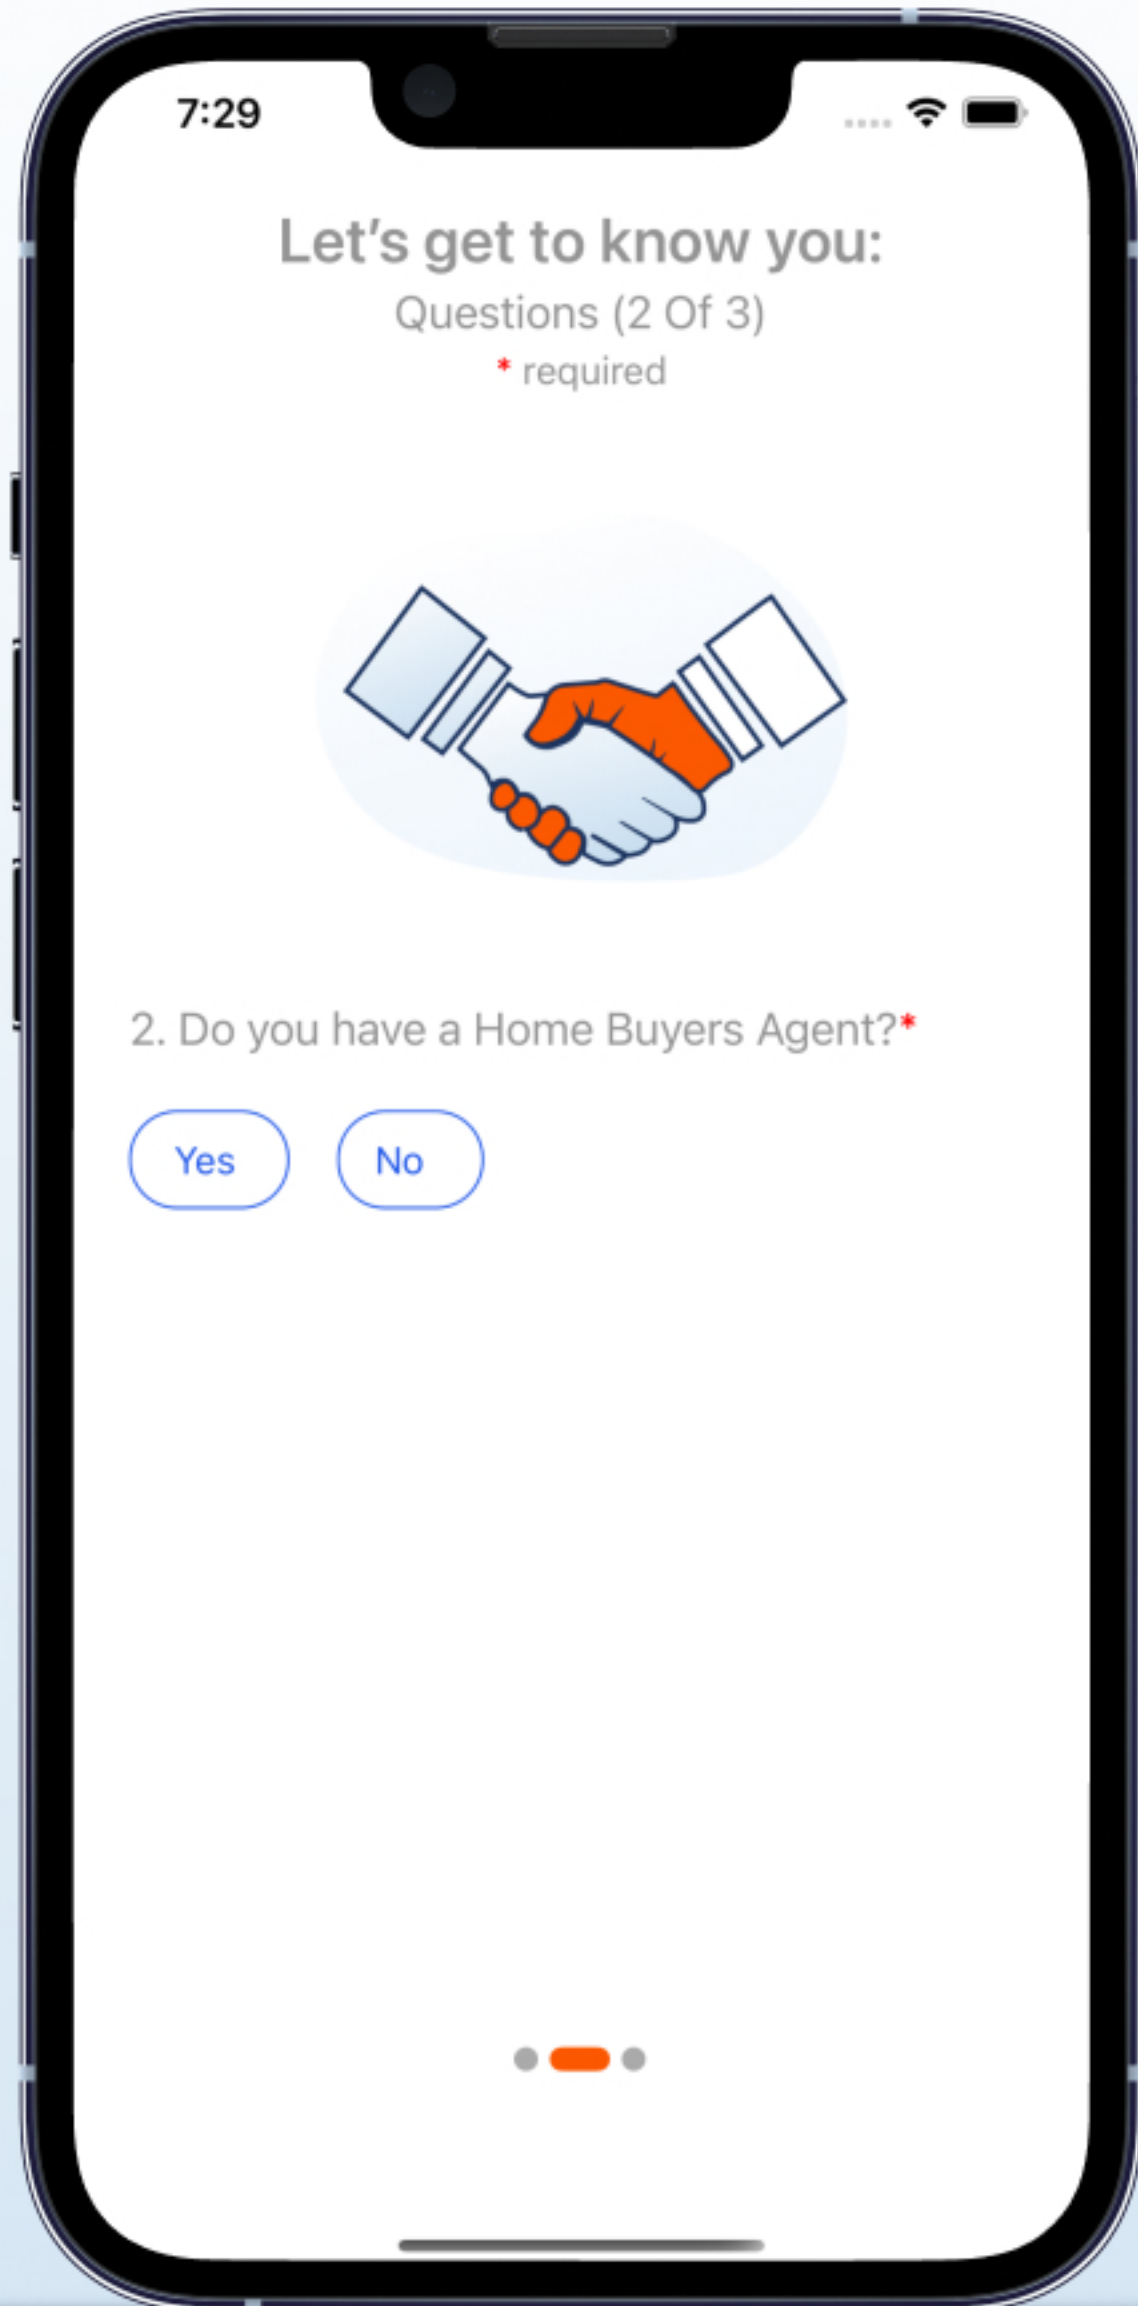

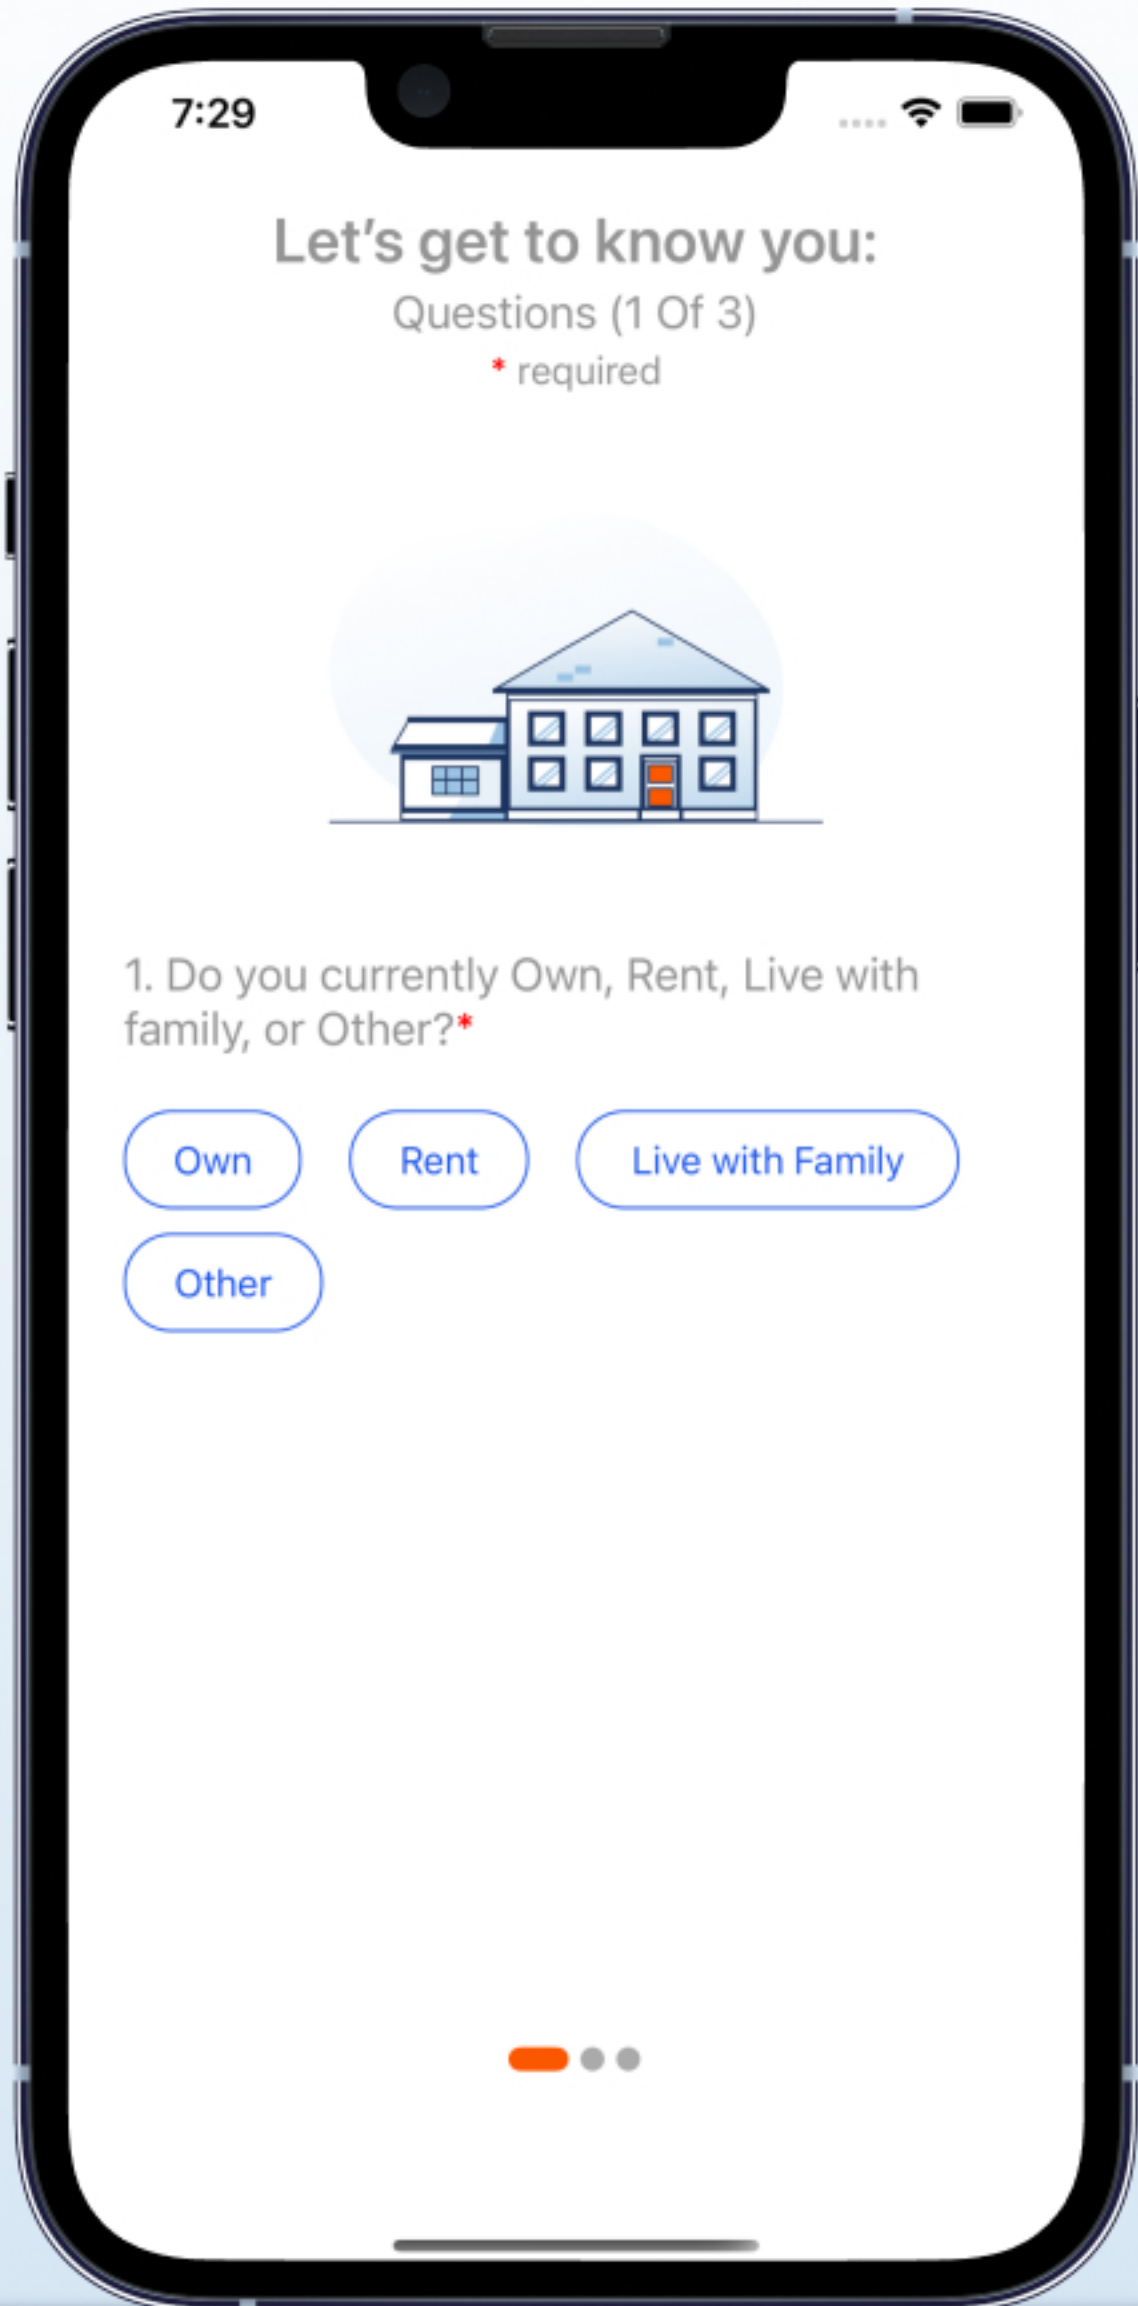

- Implement an on-demand access service for users to tour properties independently.
- Incorporate security measures to safeguard properties during tours.
- Leverage IoT technologies to support property access and enhance security.
- Maintain uninterrupted service to users, allowing property tours anytime.
- Create a scalable platform architecture to handle increased user demand.
- Implement industry-standard security protocols to protect user payments during property transactions.

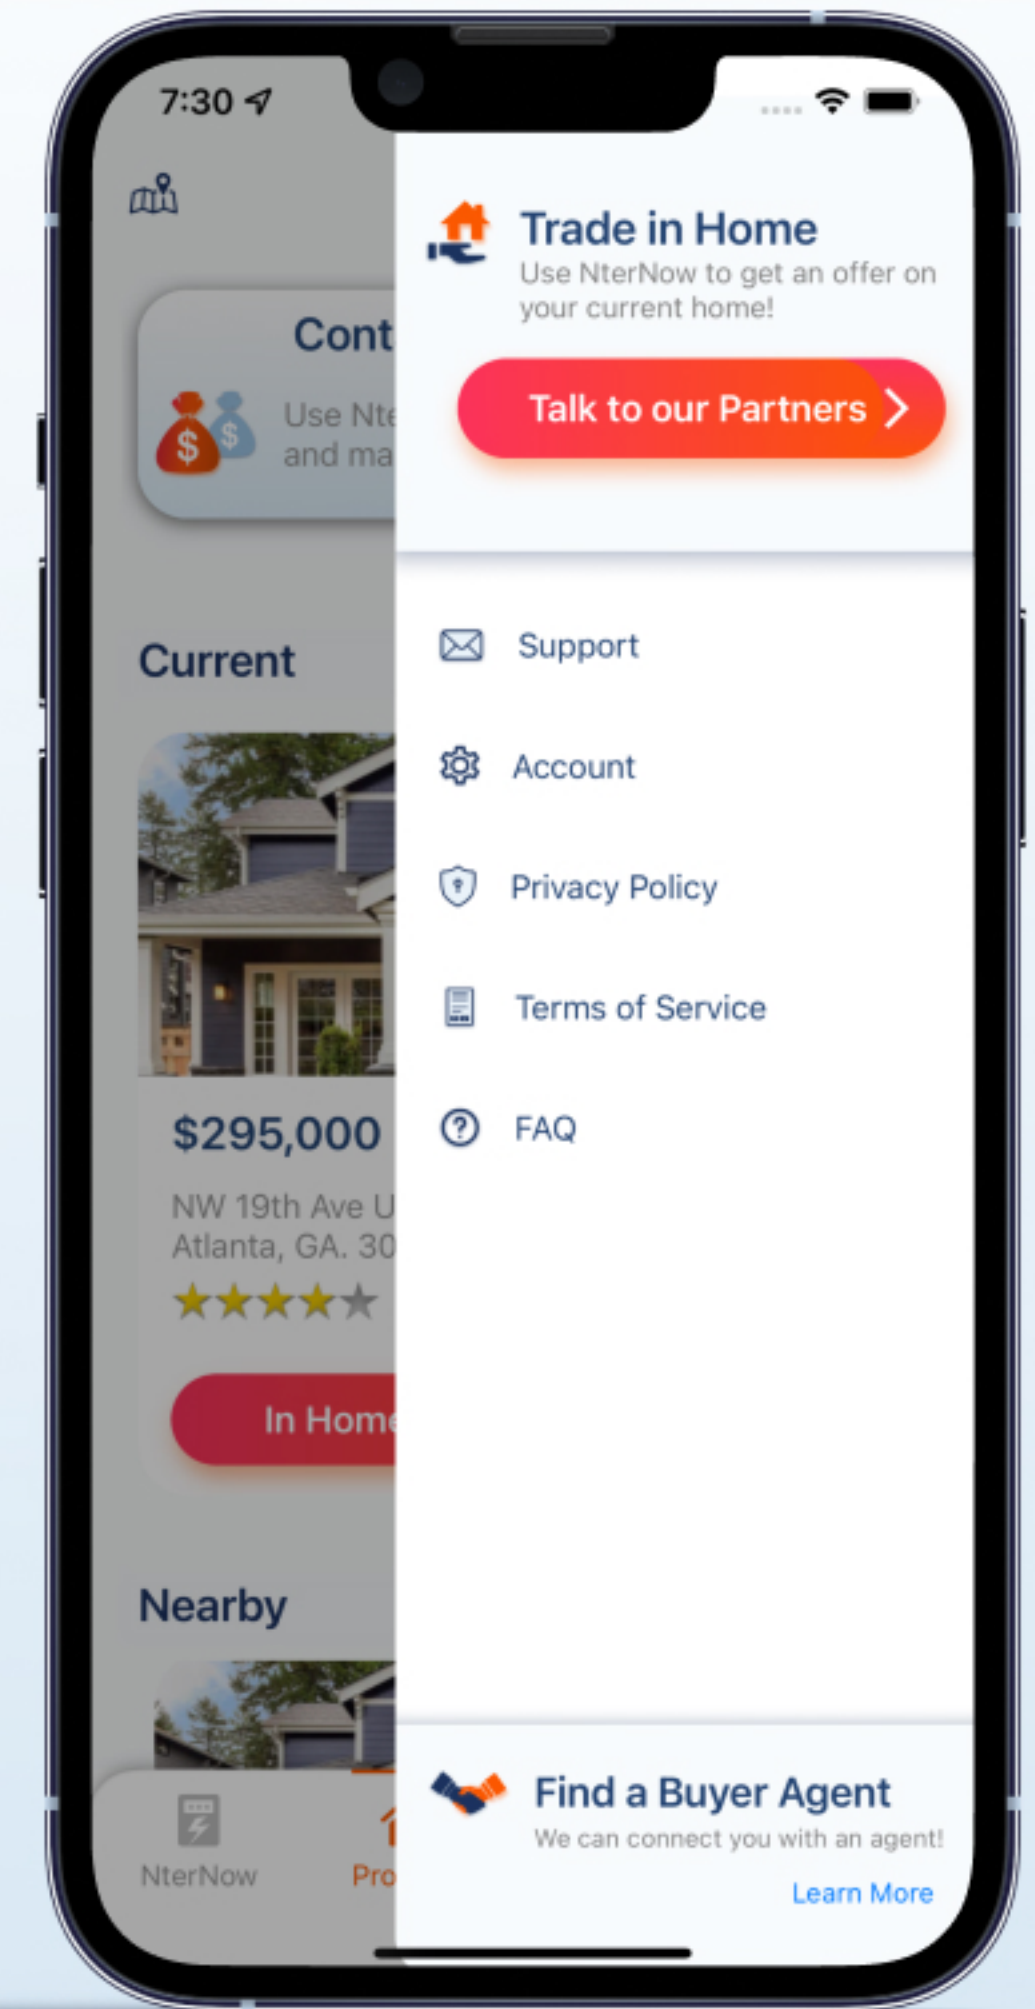

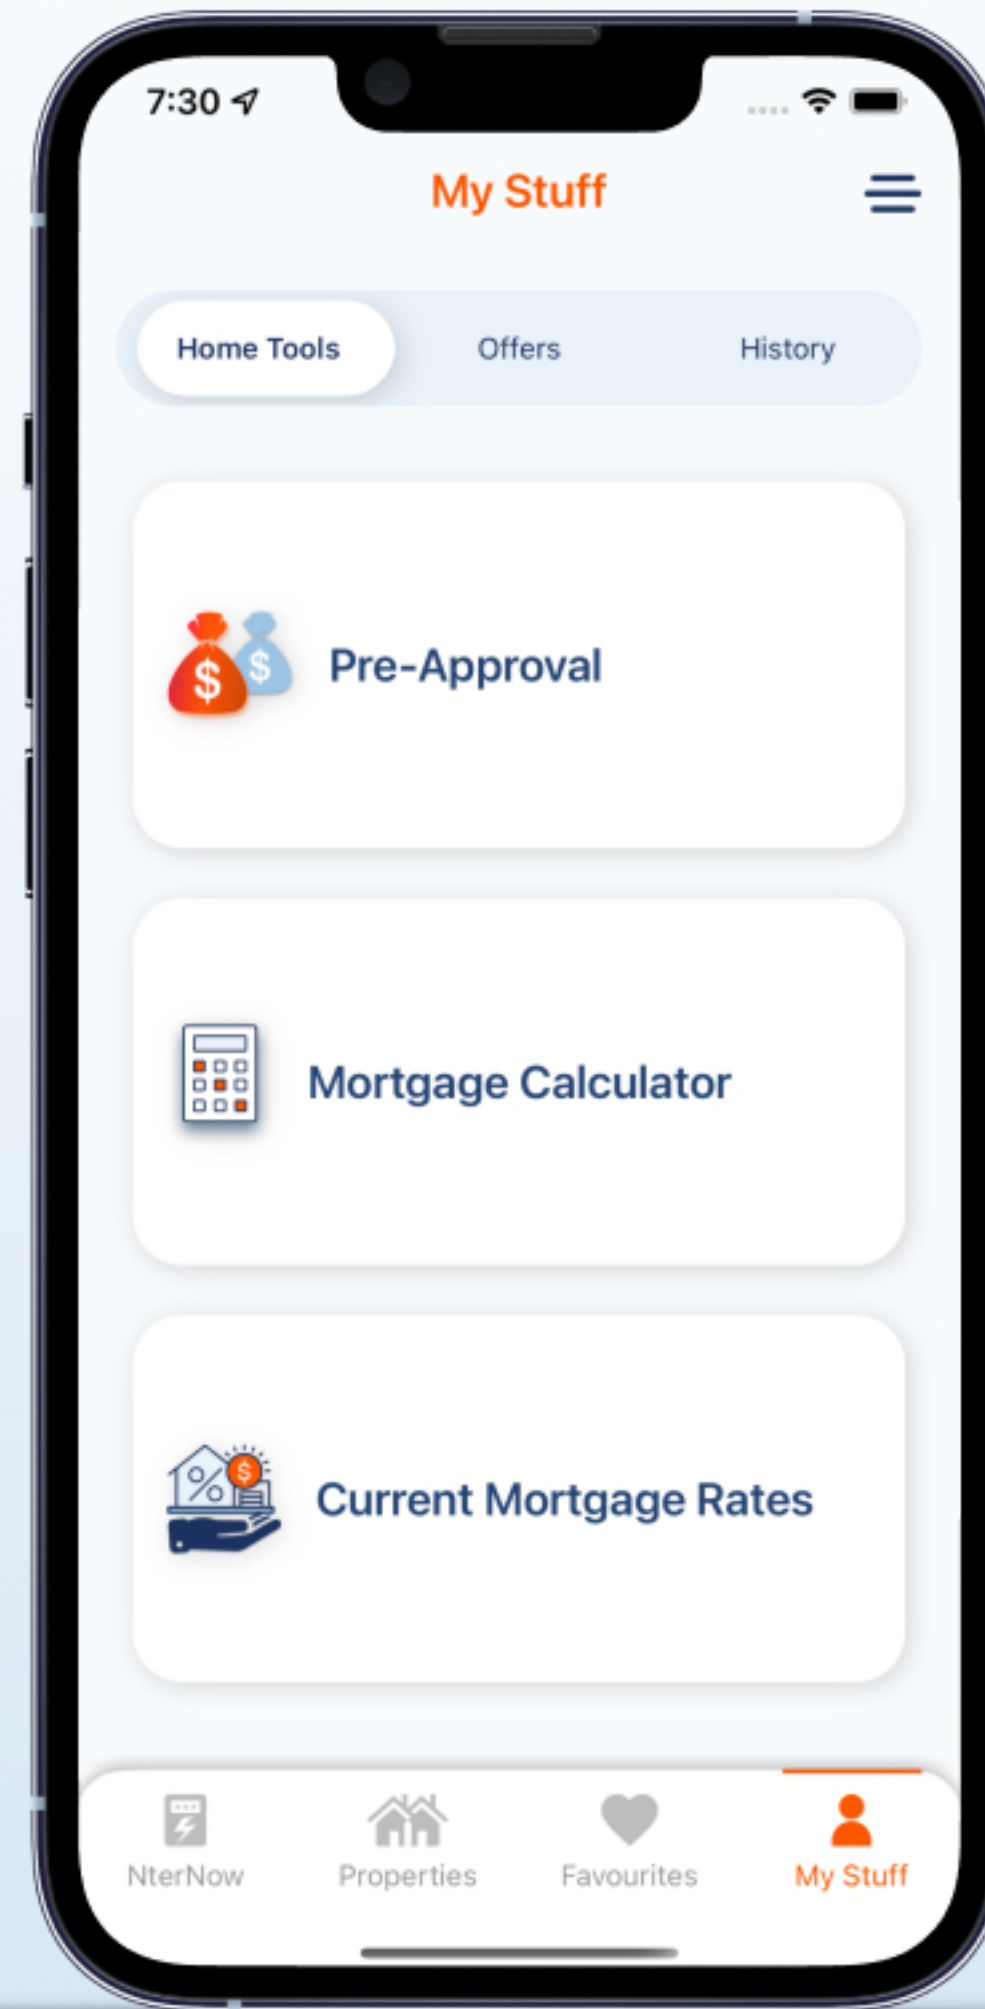

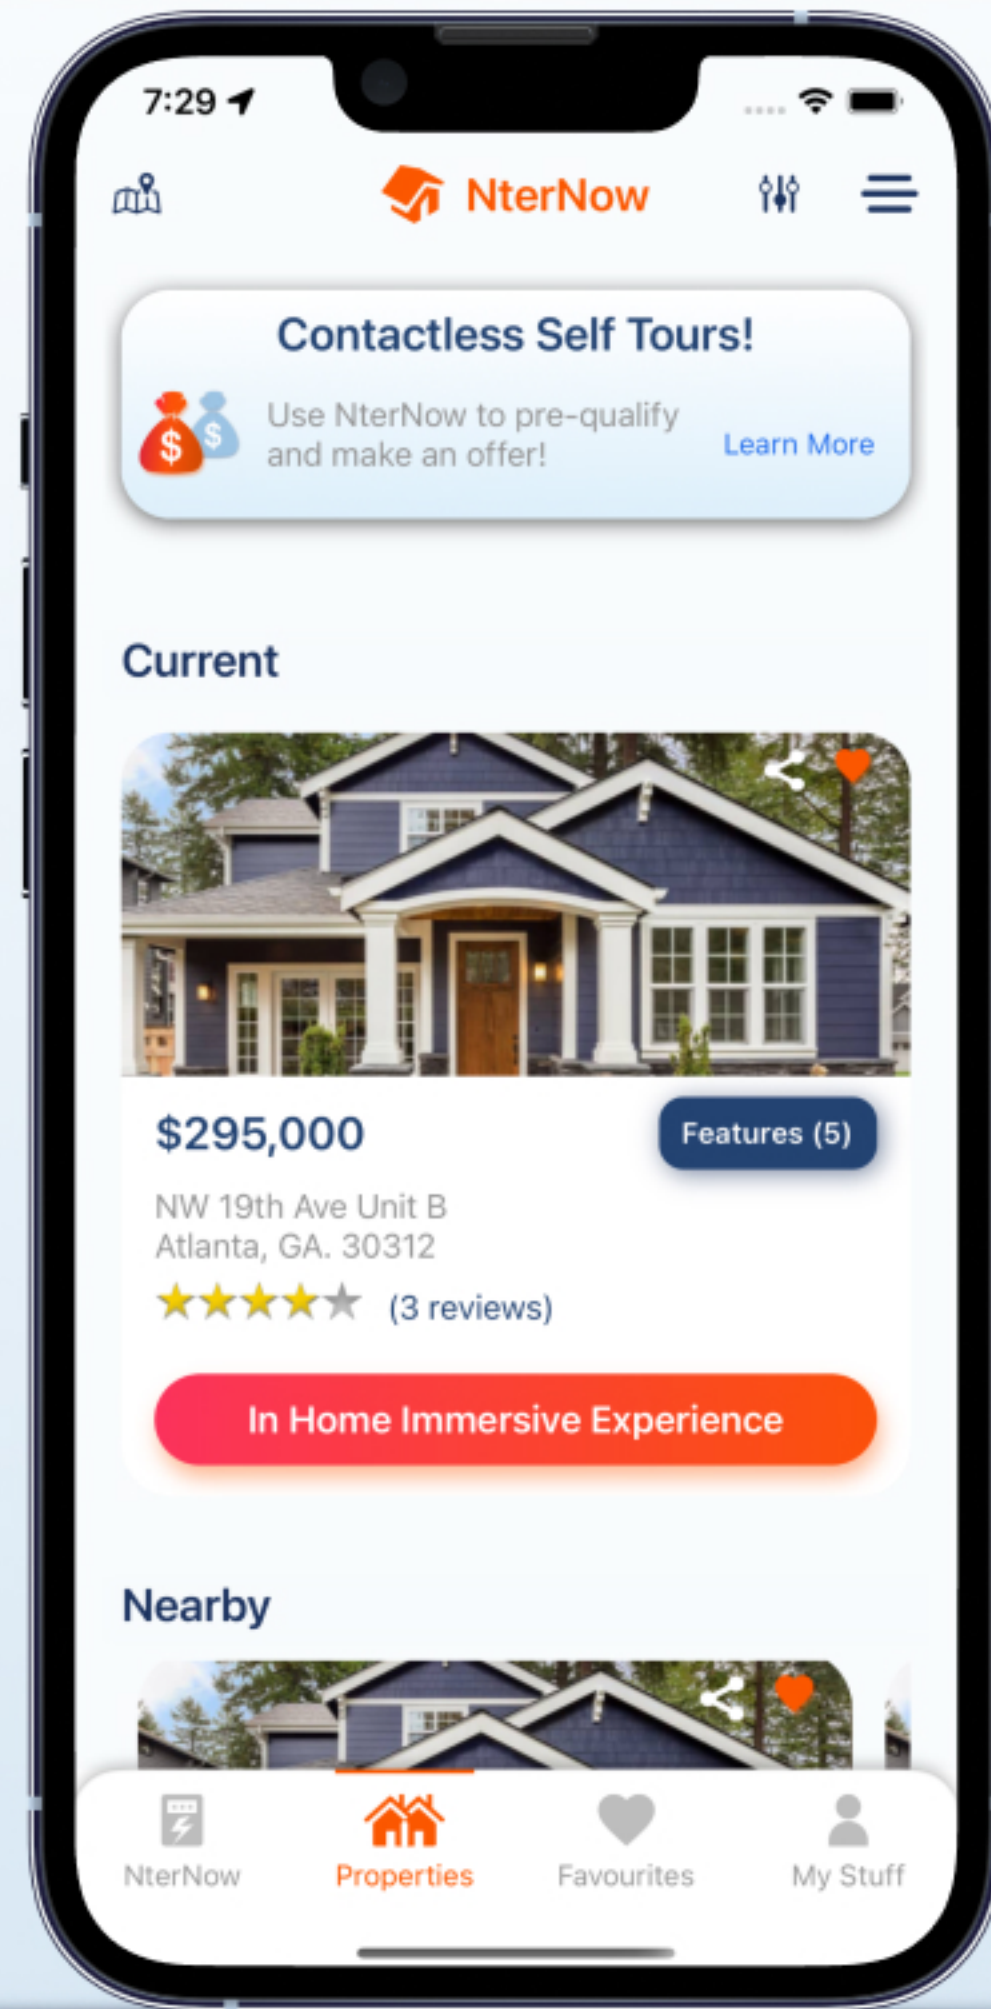

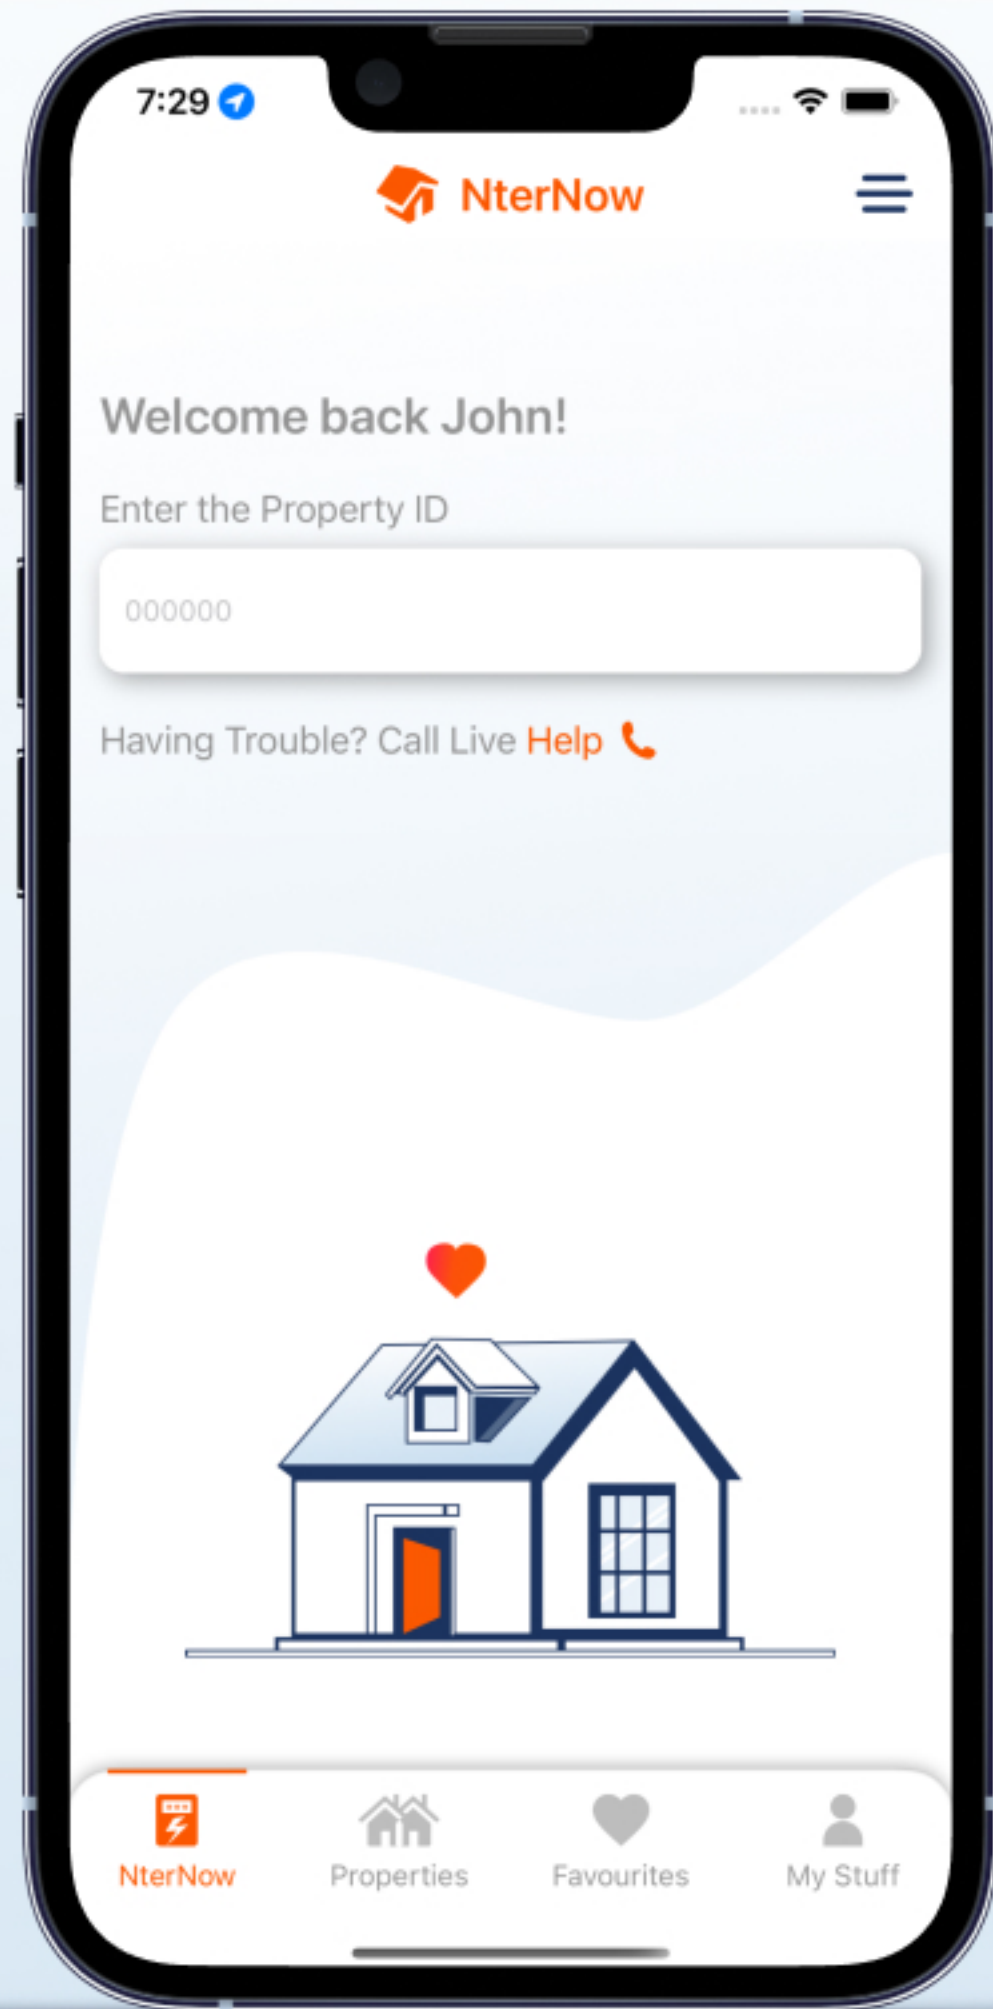

Highlighted Features

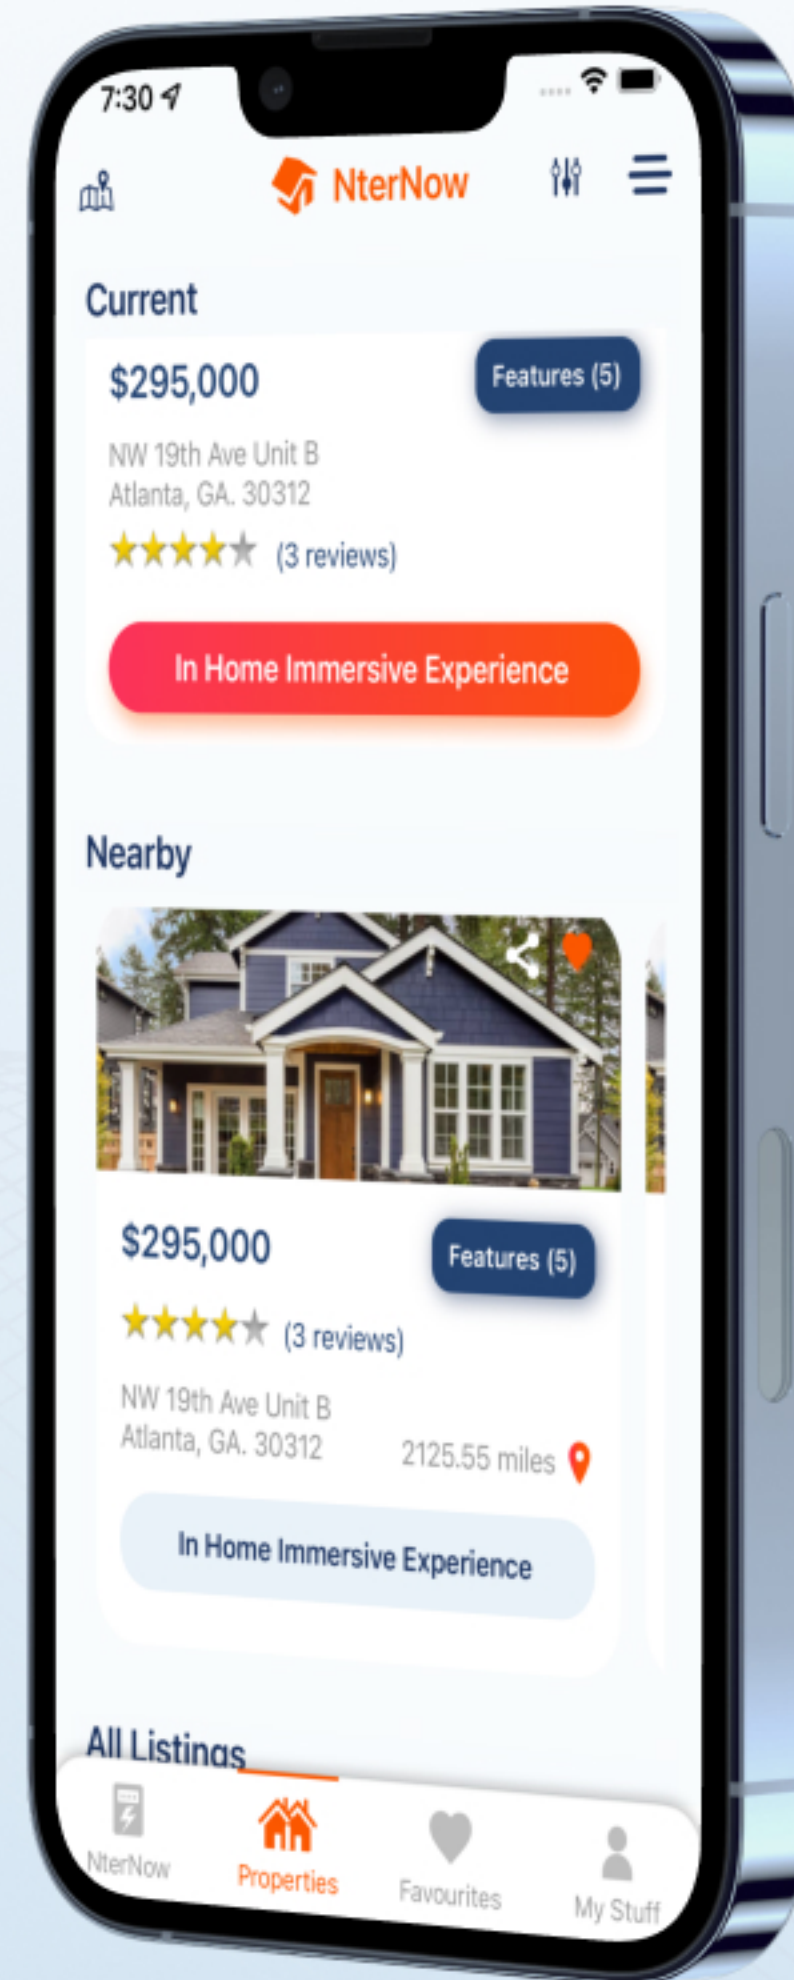

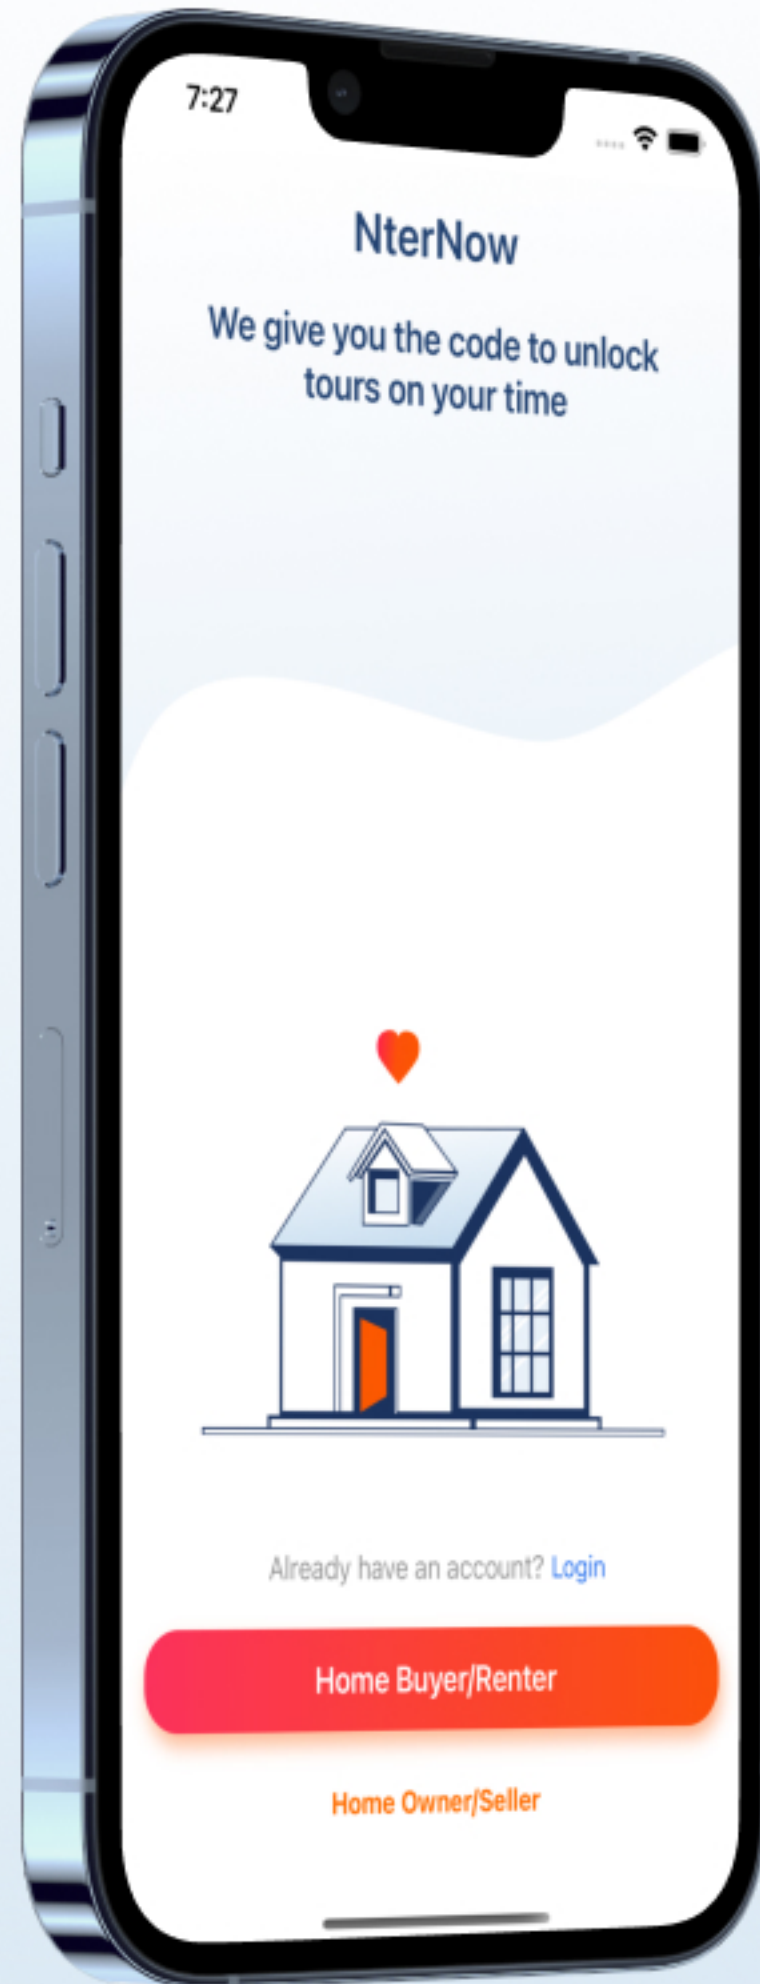

- **Self-Tour Scheduling:** Buyers can easily schedule property tours from the NterNow, offering convenience and flexibility.
- **Prospect Scheduling:** Prospective buyers can tour homes at their own convenience, enhancing the home-buying experience.
- **Efficient Sales Agent Management:** Sales agents can efficiently handle multiple communities, streamlining their workflow.
- **Agent Profile Details:** Access comprehensive details about sales agents, enabling informed decision-making.
- **Live Chat with Agents:** A built-in message tab allows users to communicate with sales agents in real-time, providing assistance and answering queries.
- **Property Listing Requests:** Users can create property listing requests to sell their homes, simplifying the listing process.
- **Agent-Free Property Access:** Users can access properties without the need for agents by registering through the app and receiving a secure access code.

NterNow

Technology Overview

- **Mobile Technology**
iOS - SwiftUI | Android - Kotlin
- **API Technology/Backend**
Node.js
- **Database**
MySQL
- **Design Tool**
Figma
- **Supported Device**
iOS & Android
- **Industry Domain**
Real-Estate
