

viiibrant  [®]

Project Brief

- Viibrant is a configurable resident engagement technology mobile application designed for senior living communities. It empowers residents to connect with neighbors, make dining reservations, register for events, and access community news from their phones. The Viibrant XE version offers an out-of-the-box solution with an administrative dashboard that allows easy configuration, even for those with limited technology experience. Enterprise administrators can manage multiple communities from a single dashboard.

Key Challenges

- Developing a system for event registration and attendee management.
- Implementing a flexible subscription model based on community size.
- Creating dynamic forms based on specific requirements.
- Establishing communication channels among residents, ensuring seamless and efficient interactions within the community.
- Managing multiple separate apps for each community, requiring a solution that streamlines app management and enhances user experience.
- Keeping track of event attendees can be challenging, especially when using paper sign-up sheets.
- Dining reservations and requests can be time-consuming to manage.

Solution Delivered

- Implementing solutions for event registration and attendees management within the app.
- Various forms are create dynamically based on requirements, with all form details sent to the master admin.
- Implementing a bulletin board/forum with categories or topics to facilitate resident communication.
- Develop a subscription-based model that allows the management of multiple communities from a single centralized system.

Highlighted Features

- **Bulletin Board/Forum:** Provides a platform to list all bulletins, topics, and topic details and allows users to add comments with pictures.
- **Events Management:** Manage events for your community in one place. Allow residents to easily RSVP and provide attendee information. Provide resident tracking and reporting for event attendance. Communicate last-minute location or schedule changes instantly. Increase event attendance with Viibrant
- **Subscription Model:** Offers a subscription-based model based on community size.
- **Forms:** Allows dynamic creation of forms based on requirements.
- **Dining Management:** Manage dining categories by community and allow residents to book dining slots
- **Communication Channels:** Facilitates announcements and staff directory for resident-staff communication.
